Captivate Perspectives - your eLearning partner

We combine TV-style video production with experienced teachers and entertainers, plus modern graphics and animation, to create courses that are popular with both learners and training professionals around the world.

Why choose Captivate Perspectives?

To be **MORE PRODUCTIVE** of course!

AVAILABLE ANYTIME, ANYWHERE

Mobile-friendly and available in SCORM, xAPI, and video formats for any LMS. Also available through our online classroom and Microsoft Teams app.

CONTROL

Pause, rewind, speed up, slow down, or even repeat lessons – Our courses allow users to fully control the video lessons.

COMPETITIVE PRICING

As a small eLearning provider we have more flexibility in licensing terms than some larger competitors.

LICENSING SERVER

Courses are managed from a unique licensing server, which tracks course usage and subscriptions, so no manual reporting & auditing is required.

SOCIAL RESPONSIBILITY

A portion of all sales goes to help fund education initiatives in the US and other countries.

DOWNLOADABLE HANDOUTS & JOB AIDS

Most courses include PDF supporting documents to reinforce the key points and provide additional quick reference information such as keyboard shortcuts.

MULTI-LANGUAGE

Many courses include subtitles and transcripts in Spanish, French, Portuguese, Chinese, Hindi, and other languages. Select courses are available in Spanish audio.

AWARD WINNING

We have won awards from eLearning Magazine, Training Industry, and the Craig Weiss group, including 'Best IT Skills Training'.

PRACTICE FILES

Select courses include downloadable practice files so students can follow along with the exercises from their PC or Mac.

BRAINBOT

Post-training spaced reinforcement using our unique BrainBot app, which delivers periodic training boosters directly to users after the course is complete.

TEACHER/LEARNER STYLE

Our Uniquely Engaging™ style keeps learners interested and involved with the material – no talking heads here.

RESPONSIVE HTML5 – NO FLASH

Designed to work on any tablet, phone, PC, or Mac.

Classroom training is often considered more engaging than online courses... **WE DISAGREE!**

It turns out there are several biological and neurological benefits inherent to the classroom that aren't found in most online training courses. **WE'RE CHANGING THAT.** Bigger Brains' unique "Teacher / Learner" style includes two people on screen – a Teacher and a Learner – to bring several classroom benefits to on-demand eLearning, including:

Facial Engagement:

The human brain is uniquely attracted to seeing faces and feels "reward" sensations when viewing a smiling face. Bigger Brains frequently shows the (often smiling) Teacher and Learner on screen to increase engagement.

Classroom Proxy:

The on-screen Learner becomes the proxy for the viewer, able to ask questions, respond to questions, and model behaviour similar to what would be experienced in a classroom.

Instinctive Elaboration:

When the brain hears a question, it triggers an automatic response – we try to think of the answer. This focuses the viewer's mind on the material, as well as increases meaningful cognitive effort around the topic, which facilitates knowledge retention.

Mirror Neurons:

Several areas of the human brain exhibit mirror neuron behaviour, in which observing another person do something triggers a response as if they are doing it themselves. This is believed to be important for learning new skills.

Cooperative Learning:

Students learning in a group setting exhibit increased persistence, greater intrinsic motivation, and a deeper understanding of learned materials. The on-screen Learner mimics a group learning experience by being the proxy for the viewer.

Practical Objectives:

Lessons begin with examples of practical ways the skills being taught can be applied.

Andragogical Structure:

Lessons, sections, courses, knowledge checks, and supporting materials are built around consistently structured objectives and outcomes.

The benefits of our unique SCORM package:

The screenshot shows a video player interface for a course titled "Mastering Excel 365 - Beginner". The interface includes a logo for "BIGGER BRAINS" in the top left, a progress indicator showing "Lesson 2 of 30" and "3%" completion in the top right, and a list of lessons on the right side. The main video area shows two people, a woman and a man, in a conversation. A green callout box with the "BIGGER BRAINS" logo is overlaid on the video, containing the text: "Why Use Excel? Excel is used to store data, manipulate, analyze it, and make important decisions." The lesson list on the right includes: Lesson 01: Introduction, Lesson 02: Navigating Excel (highlighted), Lesson 03: Using Commands, Lesson 04: Selecting Data, Lesson 05: Check Your Understanding 1, Lesson 06: Check Your Understanding 2, Lesson 07: Creating a New Workbook, Lesson 08: Entering Cell Data, Lesson 09: Using Autofill, Lesson 10: Getting Help, Lesson 11: Check Your Understanding 3, Lesson 12: Check Your Understanding 4, Lesson 13: Creating Formulas, Lesson 14: Inserting Functions, Lesson 15: Copying Formulas and Functions, Lesson 16: Check Your Understanding 5, and Lesson 17: Check Your Understanding 6.

Course Map - Displays a list of all course modules and completion status

Search - Turn on subtitles and choose language (where available)

Progress - See how much you've completed and how much is left

Handouts - Downloadable practice files to follow along with the exercises

Hosted Video - All videos are hosted by a global caching platform network, minimizing storage issues

Transcripts/Captions - Interactive transcripts and on-screen captions for better accessibility; toggle on/off

Subtitles - Turn on subtitles and choose language (where available)

All HTML, No Flash! - Tested across dozens of popular LMS systems

Player Controls - Play, pause, go forward or backwards, adjust the playback speed and adjust the volume as needed

About Our Course Names

Bigger Brains make it easy for managers to select the right courses for their needs! These naming standards will help identify which course version is the perfect fit. A Brain Bites mini-course? An Essentials course to get one up and going as fast as possible? A master class to become an app expert. There's something for everyone!

Brain Bites are short, information-rich courses designed by experts in the topic and presented by actors.

Mastering courses cover a topic in extensive detail. E.g.: "Mastering Excel 2019 - Basics"

Essentials courses cover a topic well, but are not comprehensive.

In 30 Minutes courses are a quick overview of a specific topic in about 30 minutes.

Year not in parentheses, i.e. Mastering Excel 2019 means the year is likely part of a specific product name.

Year in parentheses, i.e. (2020) indicates this is a topic which is frequently updated, and the year indicated is when this version of the course was updated.

What's New in Excel 2019?

BrainBot

Workflow learning and reinforcement is available for many courses.

BrainBot is an intelligent, AI-based chatbot that works with learners in their natural workflow without a proprietary app. It sends short, periodic interactions to help learners retain knowledge from training courses (boosters) or to learn new information (lessons).

Microsoft Teams and Webex Learning Apps

The Captivate Perspectives training library is available inside Webex and Microsoft Teams through our Captivate Perspectives Apps.

The Captivate Perspectives app, **Captivate Perspectives eLearning**, is an excellent way to turn Microsoft Teams or Webex into a mini-Learning Management System, with an entire suite of on-demand courses that can be made available to all users or assigned to specific teams or channels.

- Teams' own features can be used to discuss and collaborate around course topics
- The unique management reporting can keep track of which courses each user has completed
