Anger Management: Understanding Anger

Course Overview

Anger is a universal experience. Dogs get angry, bees get angry, and so do humans. You don't have to be a psychologist to know that managing anger productively is something few individuals, organizations, and societies do well. Yet research tells us that those who do manage their anger at work are much more successful than those who don't.

The co-worker who can productively confront his teammate about his negative attitude increases his team's chance of success as well as minimizes destructive conflicts. The customer service agent who can defuse the angry customer not only keeps her customers loyal but makes her own day less troublesome. This course is designed to help give you and your organization that edge.

Learning Objectives

- Recognize how anger affects your body, your mind, and your behavior
- Use the five-step method to break old patterns and replace them with a model for assertive anger
- Use an anger log to identify your hot buttons and triggers
- Control your own emotions when faced with other peoples' anger
- Identify ways to help other people safely manage some of their repressed or expressed anger
- Communicate with others in a constructive, assertive manner

Appreciative Inquiry

Course Overview

Do you love those moments of exception, when everything seems to have come together and things are working beautifully? Would you like to create an environment where those rare, extraordinary moments become the norm? Then you may just be ready to learn the value of Appreciative Inquiry, also known as AI. AI is a method for implementing change that is rooted in being positive, sharing stories of things that work well, and leveraging people's strengths and the power of co-creation to initiate lasting, powerful changes that can make an organization the best it has ever been, because of people who care and are committed.

Learning Objectives

- Recognize and work with the fundamentals of Appreciative Inquiry
- Describe the 4-D's of Appreciative Inquiry: discovery, dreaming, design, and destiny
- Work through a simple Appreciative Inquiry process
- Create thoughtful, meaningful questions for your own Appreciative Inquiry initiative
- Help organizations review what's important, what they can become, and how they can get there

Balanced Scorecard Basics

Course Overview

Over the past several decades, organizations have come to realize that success can be measured in other ways besides dollars and cents. Intangible assets (such as a company's reputation, the knowledge base created by their employees, and training initiatives) can make up a huge portion of a company's wealth.

Learning Objectives

- Define what the balanced scorecard is
- Identify the benefits of the scorecard
- Create a vision statement for the balanced scorecard
- Understand what corporate values, mission statements, and vision statements are and how they tie into the balanced scorecard process
- Determine if the balanced scorecard is right for your organization
- Describe the key elements of the balanced scorecard process
- Identify a strategy map, tactical action plan, and balanced scorecard
- Identify the components of supporting balanced scorecard plans
- Understand what processes you will need to support the balanced scorecard
- Identify the members of different balanced scorecard teams

Being a Team Player

Course Overview

Teamwork is essential in any successful enterprise, and to have effective teams, an organization must be comprised of individuals who pride themselves on being great team players. Many of us consider ourselves to be team players, but are we really? Do we know what that takes; and what managers consider to be the qualities that make a person a team player, or that make a good team player a 'great' team player? Everyone brings their own skills and strengths to the table; understanding how to use those skills within the context of a team is vital to help an organization succeed.

Learning Objectives

- Understand the definition of a team player and a non-team player
- Know the difference between a team player and a non-team player
- Learn the qualities possessed by a team player
- Determine what type of team player you are and how that functions in your workplace
- Know and understand what it takes to be a team player
- Discover the different types of teams that exist within a company
- Learn what working together as a team looks like
- Learn the different types of workplace teams and what types of teams successful organizations need
- Develop strategies to improve teamwork

Beyond Workplace Politics: Using Social and Emotional Competencies

Course Overview

Workplace politics encompasses the power and authority processes and behaviors that are at work in a particular workplace. It is how the links between people in the workplace work. There are workplace politics at play in every organization!

In 1990, two American psychologists (Dr. Jack Mayer and Dr. Peter Salovey) purported that if there was a cognitive intelligence or IQ then there must be an emotional intelligence (sometimes known as EQ). Daniel Goleman, the co-founder of the Collaborative for Academic, Social, and Emotional Learning (CASEL) theorized the social aspect of behavior as a complement to the emotional. His definition expanded to: “Social and emotional intelligence involves understanding your feelings and behaviors, as well as those of others, and applying this knowledge to your interactions and relationships.” In his work with CASEL he developed five interrelated sets of Social and Emotional Competencies: Self-Awareness, Self-Management, Social Awareness, Good Relationship Skills, and Responsible Decision Making. This course will explore the social and emotional competencies and their role in working beyond workplace politics!

Learning Objectives

- Understand what Workplace Politics is and why it is not always bad
- Distinguish between formal and informal workplace hierarchies
- Use practical steps to negate the influence of rumors
- Define Social and Emotional Intelligence and understand their importance in navigating workplace politics
- Understand the importance of Self-Awareness in dealing with workplace politics and think about your own strengths and abilities
- Understand the role of Self-Management in the workplace and learn to improve self-management through reflection
- Understand the roles of Empathy, Organizational and Service Awareness in the workplace and social awareness skill development
- Identify good relationship skills
- See the importance of responsible decision making and identify decision traps that should be avoided

Branding: Creating and Managing Your Corporate Brand

Course Overview

Your brand is the vehicle that propels your product or service into your customer's lives, and into their hearts. A good brand is much more than an attractive image combined with some witty type. Your brand must reflect the heart and soul of your product, and offer a promise that you can live up to.

This course will get you started on the road to creating a perfect brand. The first half of the course will cover the basics of branding, including how to develop a visual identity from start to finish. We will also give you some graphic design tips to help you communicate your expectations to a professional designer. The second half will focus on how to put your brand out there in the right way. We'll also talk about how to keep your brand energized and alive with monitoring and evaluation tools.

Learning Objectives

- Define what a brand is (particularly a strong brand) and what branding is about
- Define various types of brand architecture and brand extension
- Identify your brand's products, the features of those products, and their values
- Write a mission, vision, and style statement for a brand
- Describe the basics of positioning a brand
- Understand the basics of creating a visual identity, including a brand name, slogan, and logo
- Help your employees live the brand by empowering them to be ambassadors and creating strong brand touchpoints
- Effectively plan an internal and external brand launch
- Monitor and evaluate your brand, and understand how to respond to the results

Business Ethics for the Office

Course Overview

What exactly makes a decision ethical? The problem with ethics is that what may seem morally right (or ethical) to one person may seem appalling to another.

This course will not provide you with an easy way to solve every ethical decision you will ever have to make. It will, however, help you define your ethical framework to make solving those ethical dilemmas easier. We'll also look at some tools that you can use when you're faced with an ethical decision. And, we'll look at some techniques you can use so you don't get stuck in an ethical quandary. Best of all, we'll look at a lot of case studies so that you can practice making decisions in a safe environment.

Learning Objectives

- Understand the difference between ethics and morals
- Understand the value of ethics
- Identify some of your values and moral principles
- Be familiar with some philosophical approaches to ethical decisions
- Identify some ways to improve ethics in your office
- Know what is required to start developing an office code of ethics

Business Etiquette: Gaining That Extra Edge

Course Overview

If you've ever had an awkward moment where:

- You aren't sure which fork to use,
- You don't know which side plate is yours,
- You've ever had to make small talk with a Very Important Person and been lost for words...

Then you know just how agonizing such moments can be. Even worse (and what can be even more damaging to your career) are the social gaffes you aren't even aware you make. This course will help you handle most of those socially difficult moments. You'll have an extra edge in areas you may not have given a lot of thought to before.

Learning Objectives

- Network effectively, including making introductions, shaking hands, and using business cards appropriately
- Dress appropriately for every business occasion
- Feel comfortable when dining in business and formal situations
- Feel more confident about your business communication in every situation

Coaching and Mentoring

Course Overview

Coach, Mentor, Role Model, Supporter, Guide... do these words ring a bell? Being a coach involves being able to draw from several disciplines. Coaching is based on a partnership that involves giving both support and challenging opportunities to employees. Mentorship is a related skill that is often a part of coaching. It's about being a guide, offering wisdom and advice when it is needed.

Knowing how and when to coach (and when to use other tools, like mentoring) is an essential skill that can benefit both you and your organization.

Learning Objectives

- Understand how coaching can be used to develop your team
- Develop the coaching and mentoring skills that help improve individual performance
- Demonstrate the behaviors and practices of an effective coach
- Recognize employees' strengths and give them the feedback they need to succeed
- Identify employee problems and ways you can help to correct them

Code of Conduct: Setting the Tone for Your Workplace

Course Overview

Workplaces are made up of diverse groups of people with diverse motivations, backgrounds, and ethics. When such groups are brought together, sometimes there are opportunities for ethical, moral, financial, or even legal, boundaries to be crossed.

Sometimes those boundaries are crossed with disastrous results.

A workplace code of conduct is a tool that can be used to prevent such digressions by providing a framework for employees to follow of what is expected of them and how to conduct themselves in various situations.

This course will look at the material that goes into a code of conduct and will allow participants to build their own as the day goes on.

Learning Objectives

- Identify what a code of conduct is and why a business should have one
- Identify what goes into a code of conduct
- Discuss how to implement a code of conduct in the workplace
- Create a code of conduct for a business

Communications for Small Business Owners

Course Overview

Communication between individuals is a two-way street, but communication between a small business and its customers is a multi-lane highway. Navigate this highway successfully and you increase customer numbers and profits. Set out on this highway unaware, ill-prepared, or unconvinced of its importance, and you will lose ground to your competitors.

This course will introduce and reinforce the essential components of written communication that will connect you with existing and potential customers. If you are new to the communications highway, this course will provide the foundation for future development. If your company has some communications expertise, this course will help you strengthen and polish your essential components.

Learning Objectives

- Define the essential pieces of communication
- Customize these essential pieces for your company
- Identify the processes and plans needed for clear communications
- Develop, maintain, and evolve effective content for your communications

Conducting Effective Performance Reviews

Course Overview

Performance reviews are an essential component of employee development. The performance review meeting is an important aspect of career planning, and the outcomes of the meeting should be known to the employee and supervisor before the meeting actually takes place. Remember what the German philosopher Goethe said: “Treat people as if they were what they ought to be and you help them become what they are capable of being.”

Setting goals and objectives to aim for will give both supervisors and employees a focus, and is one of the key aspects to meeting overall company objectives. Supervisors must also learn how to give feedback, both positive and negative, on a regular and timely basis so that employees can grow and develop. Performance appraisals involve all these activities.

Learning Objectives

- Recognize the importance of having a performance review process for employees
- Understand how to work with employees to set performance standards and goals
- Develop skills in observing, giving feedback, listening, and asking questions
- Identify an effective interview process and have the opportunity to practice the process in a supportive atmosphere
- Make the performance review legally defensible

Conflict Resolution: Getting Along In The Workplace

Course Overview

Many people see conflict as a negative experience. In fact, conflict is a necessary part of our personal growth and development. Think of when you were trying to choose your major in college, for example, or trying to decide between two jobs. However, conflict becomes an issue when the people involved cannot work through it. They become engaged in a battle that does not result in growth. When this type of conflict arises, negative energy can result, causing hurt feelings and damaged relationships. This course will give you the tools that will help you resolve conflict successfully and produce a win-win outcome.

Learning Objectives

- Understand what conflict is and how it can escalate
- Understand the types of conflict and the stages of conflict
- Recognize the five most common conflict resolution styles and when to use them
- Increase positive information flow through non-verbal and verbal communication skills
- Develop effective techniques for intervention strategies
- Become more confident of your ability to manage conflicts to enhance productivity and performance

Creating Successful Staff Retreats

Course Overview

A staff retreat can evoke some pretty strong emotions. Dread of a week hanging around with people you would never invite home for dinner. Queasy thinking about throwing yourself backwards hoping your 'new friends' will catch you. However, staff retreats still continue even in hard times. Why? Many of the things we really need to get done take longer than the two hours you have in meeting time. As well, the retreat itself can bring about a change in approach not possible sitting in your boardroom for a meeting. This course will give you tools to be able to create staff retreats that are successful and help to bolster productivity, sales and positive workplace culture.

Learning Objectives

- Discuss experiences with staff retreats
- Know the reasons why staff retreats are conducted
- Understand the main staff retreat undertakings categories
- Develop and present retreat activities
- Identify the critical elements for success of a staff retreat
- Develop a planning checklist
- Appreciate the keys to running a staff retreat
- Develop an evaluation questionnaire
- Recognize post-retreat activities that will ensure the continuing success of your staff retreats
- Realize your top three take home ideas for creating successful staff retreats

Creating Winning Proposals

Course Overview

Proposals are persuasive documents that are fundamental tools in organizational funding and output. This course will look at sources of funding, types of proposals and how to write proposals that will meet funding agencies requirements. This will include a number of tips and techniques to increase the potential success of your proposals. An important but often overlooked aspect of proposal writing will also be covered- Building and Maintaining Relationships. Relationships are built on honesty. Potential projects must be a good fit for your organization and your organization must be ready to do the work contained in the proposal. The most successful proposals are going to be those that fulfill the mission and values of your organization and that of the funding agencies as well!

Learning Objectives

- Locate potential funders for your organizations on the Internet and use evaluative skills to identify the appropriateness of funding related to your own organization
- Explain the necessity of matching funders interests with organizational needs and use this knowledge in decisions about the validity of submitting a funding proposal
- Describe and understand the basic elements of proposal writing for not-for-profit organizations
- Describe and understand the basic process for successful proposal writing
- Analyze effective relationship-building strategies to engage with funders and use this knowledge in writing a funding proposal
- Describe at least five reasons why funding proposals can be rejected
- Plan, write and submit a proposal in response to funders guidelines

Creative Thinking and Innovation

Course Overview

Creative thinking and innovation are vital components in both our personal and professional lives. However, many people feel as though they are lacking in creativity. What most of us do not recognize is that we are creative on a daily basis, whether it's picking out what clothes to wear in the morning or stretching a tight budget at work. While these tasks may not normally be associated with creativity, there is a great deal of creativity involved to get those jobs done.

While some people seem to be simply bursting with creativity, others find it a struggle to think outside the square. If you fall into the latter category, it is important to understand that boosting your creative and innovative abilities takes practice. Recognizing and honing your own creative potential is a process. That's what this course is all about.

Learning Objectives

- Identify the difference between creativity and innovation
- Recognize your own creativity
- Build your own creative environment
- Explain the importance of creativity and innovation in business
- Apply problem solving steps and tools
- Use individual and group techniques to help generate creative ideas

Developing a High Reliability Organization

Course Overview

Today's world is full of the unexpected. System failures, terrorism events, disease outbreaks, and superstorms disrupt businesses every day, sometimes to an unrecoverable point. Despite these challenges, some services (such as power plants, hospitals, and airports) have no choice but to continue operating.

This course will explore how these organizations maintain high reliability even in times of serious crisis and stability. We will share their secrets in a way that can be applied to all organizations in order to create high reliability and continued success.

Learning Objectives

- Define the characteristics of a high reliability organization
- Define key concepts required for high reliability, including mindfulness and expectations
- Describe the five principles governing high reliability organizations: preoccupation with failure, resistance to simplification, sensitivity to operations, commitment to resilience, and deference to expertise
- Audit activities at all stages to assess the business' reliability

Developing a Lunch and Learn Program

Course Overview

If you look at any successful organization they have the support of employee development as a core part of their culture. For these organizations it goes beyond professional or even personal development to offering learning opportunities that create increased energy, creativity and fun. Lunch and Learns are a venue to foster sharing and peer learning and are typically aimed at fostering cross-organization collaboration and communication.

They are a tool for sharing of information, approaches and talent. Further, they offer opportunities for networking in a safe, friendly and relaxed atmosphere.

This course will give you tools to be able to create a Lunch and Learn Program that creates opportunities for learning that might not otherwise happen. You will also prepare a short Lunch and Learn session and receive feedback from other course participants.

Learning Objectives

- Explain the benefits of implementing a Lunch and Learn Program
- Outline the aims and expectations of a Lunch and Learn Program for your organization
- Utilize a number of success factors to create a Lunch and Learn Program for your organization
- Develop a promotion plan for your organization's Lunch and Learn Program
- Develop a list of potential Lunch and Learn session topics

Diversity, Equity, and Inclusion

Course Overview

The purpose of this course is to raise the participant's awareness about diversity, equity and inclusion. These terms are often used interchangeably but they are separate concepts and principles. Diversity, equity and inclusion recognize that there are differences and that everyone is unique. This leads to creativity, innovation and increased productivity in the workplace. Diverse, equitable and inclusive workplaces give people the opportunity to bring their authentic selves and feel a sense of belonging.

Learning Objectives

- Understand the importance of diversity, equity, and inclusion for workspaces
- Be able to describe and analyze key issues of diversity, equity, and inclusion in one's work environments and community
- Grasp the power of diversity as a tool for creativity, and productive collaboration in the workspace
- Have the opportunity to share elements of one's culture with others
- Learn that norms and practices one thinks are universal may be culturally dependent

Emotional Intelligence

Course Overview

Emotional intelligence, also called EQ, is the ability to be aware of and to manage emotions and relationships. It's a pivotal factor in personal and professional success. IQ will get you in the door, but it is your EQ, your ability to connect with others and manage the emotions of yourself and others, that will determine how successful you are in life. We have all worked with and listened to brilliant people. Some of them were great and... well, some were not so great. The mean and the meek and all those in between can teach us more than they realize. When we look at the truly extraordinary people who inspire and make a difference you will see that they do this by connecting with people at a personal and emotional level. What differentiated them was not their IQ but their EQ - their emotional intelligence. This course will help you develop your emotional intelligence.

Learning Objectives

- Understand what emotional intelligence means
- Recognize how our emotional health and physical health are related
- Learn techniques to understand, use, and appreciate the role of emotional intelligence in the workplace
- Understand the different emotions and how to manage them
- Create a personal vision statement
- Understand the difference between optimism and pessimism
- Validate emotions in others

Employee Accountability

Course Overview

An article in the March 11, 2010 edition of TIME magazine purported to explain “why we have entered the post-trust era.” Indeed, we seem to be in a time where people act inappropriately and then refuse to take responsibility for their actions. Who can we blame for the world economic crisis, issues with religion, the outcomes of our governments, or the state of the environment? More to the point, why do we spend so much time and energy looking to pin the blame on someone (usually anyone but ourselves)?

With this in mind, it’s no wonder that organizations who promote accountability are more successful and more productive. In this course, you will learn about what accountability is, how to promote it in your organization, and how to become more accountable to yourself and others.

Learning Objectives

- Understand what accountability is and what events in history have shaped our view of it
- Identify the requirements for personal and corporate accountability
- Apply the cycle of accountability and the fundamental elements required to build an accountable organization
- Describe what individuals must do to become accountable
- Build skills required for accountability, including goal setting, giving and receiving feedback, and delegation
- Pinpoint ways to build ownership in your organization
- Isolate areas for further self-improvement

Employee Dispute Resolution: Mediation through Peer Review

Course Overview

Have you ever been in a workplace situation where a supervisor has made a decision that you didn't agree with? Did you wish that you could ask someone else what they thought of the decision; whether they would have done the same thing? The peer review process offers employees just that chance, using a formalized procedure to ask, consider, and resolve just these sorts of questions. This course will teach you everything you need to know about employee dispute resolution through mediation.

Learning Objectives

- Describe what the peer review process is
- Apply a process for employees to file grievances and for management to respond
- Choose a facilitator and panel
- Understand what is involved in the hearing process, from preliminary meetings to the hearing, and the decision process
- Explain what responsibilities and powers a panel should have

English as a Second Language: A Workplace Communications Primer

Course Overview

“A different language is a different vision of life,” said the Italian filmmaker Federico Fellini. Employees who use English as a second language demonstrate great commitment and skill in learning a language other than their native tongue. There are subtle differences between languages because of social influences and workplace demands that can create or strengthen the language barrier for employees who have learned a language other than English in their formative years. That barrier is an obstacle for both employer and employee, severing what could be productive relationships with co-workers and clients.

This course will identify any gaps in communication as the result of cultural language differences, and provide exercises to help connect those gaps. This course is written for employees with intermediate competency in English as their second language. Exercises will explore the four main categories of communication: Speaking, Listening, Reading and Writing.

Learning Objectives

- Acknowledge existing skills in the areas of Speaking, Listening, Reading and Writing
- Recognize gaps in skills compared to workplace communication needs
- Understand cultural and workplace influences on communication and how to function within them
- Learn and practise effective skills for oral and written communication, including technical forms such as email and videoconferencing
- Develop an individual Action Plan for continued skill reinforcement and growth

Environmental Sustainability: A Practical Approach to Greening Your Organization

Course Overview

Environmental Management Systems (EMS) involve a set of processes and practices that enable an organization to reduce its environmental impacts and increase its operating efficiency. A well-designed EMS can help an organization address its regulatory demands in a systematic manner thereby reducing the risk of noncompliance. An EMS can also help address non-regulated issues such as pollution prevention, odor management, water usage and energy conservation.

In this course, participants will learn about EMS and how it can benefit their organization. Through the use of a Case Study and information they bring about their own company participants will leave with a draft EMS for their organization. It will include organizational Environmental Aspect and Impacts, and Objectives and Targets for their organization's significant environmental impacts.

Learning Objectives

- Define what an Environmental Management System (EMS) is and the benefits of establishing one in your organization
- Understand 'greenwashing' and ways that your organization can avoid 'greenwashing'
- Know the six KPI areas as defined by the Eco-Management and Audit Scheme (EMAS)
- Know the steps necessary to develop an EMS
- Be able to determine the Environmental Impacts and Aspects within an organization
- Understand and apply an Environmental Significance standard to organizational Environmental Impacts
- Set Objectives and Targets for significant organizational environmental impacts

Generation Gap: Closing the Generation Gap in the Workplace

Course Overview

There are currently five generations in the workforce. Only a few short years ago employers who were expecting to be faced with mass retirements are now looking at accommodating workers who cannot afford to retire, or are simply healthy and happy enough they'd like to stay at work. However, the labor force continues to put in hard work and lots of strategy to find the right people to fill vacancies and to be able to serve their customers.

This course examines the history and reality of the generation gap, especially for recruiters and succession planning. In it, we will explore whether defining the actual limits of each generation is most important, or whether the merits of people within the context of employment is the bigger issue. After all, understanding others helps us to understand ourselves and to manage the people that we work with. We will also explore problems, solutions, and strategies to help overcome issues of the generation gap.

Learning Objectives

- Identify where the generation gap issue surfaces, and the impact it has on the modern workforce
- Describe and apply language that is specific to each generation currently in the workplace
- Explore organization strategies that overcome gap issues
- Evaluate the need and effectiveness of recruiting, retention, and succession plans in context of the generation gap

Getting Your Job Search Started

Course Overview

While looking for work can be an exciting time, it can also involve fear and discomfort about change and the unknown. Whether you are already in the midst of a job search or just thinking about it, this course will help you to determine what your skill set is made up of, the kind of work that is important and realistic to include in your search, and how to get started. Today's job market is not the same as it was even five years ago. Knowing where to go, who to talk to, and the opportunities that are available will help to shift you from someone who dreams about having a job, to someone who has the job they always wanted.

Learning Objectives

- Describe your skills, values, and beliefs about work and looking for opportunities
- Demonstrate an understanding for the types of work available to you and where to go for more information

Giving Effective Feedback

Course Overview

As human beings, we often hunger for feedback. However, many people will tell you that when they do get feedback, it's often because of something they have done wrong. This course is designed to help workplace leaders learn how to provide feedback any time that the message is due. Whether feedback is formal or informal, and whether it is provided to employees, peers, or someone else, there are ways that it can be structured to be effective and lasting.

This course will help students learn why the way we deliver feedback is important, how to deliver a message so that people accept it and make changes that may be needed, and how to accept feedback that we are offered.

Learning Objectives

- Explain why feedback is essential
- Apply a framework for providing formal or informal feedback
- Use descriptive language in delivering feedback
- Describe six characteristics of effective feedback
- Provide feedback in real situations

Global Business Strategies

Course Overview

Opportunities to take a regional business into the global market make it possible to strategically, smartly, and profitably accomplish more than you can by staying local. To prepare, you need to set your business up for success by being open to learning, to applying new ideas, and to continually reviewing how you can create success in the global market.

Topics such as trade financing, regulatory considerations, international business planning, sustainability, and much more are included in this course. The materials here are well suited for small and medium sized business leaders as they prepare to take their company into the global marketplace.

Learning Objectives

- Describe the complexities of doing business in a global context
- Discuss trends in global business
- Apply strategies and tools needed to help shift a regional business into a global enterprise
- Closely evaluate your current business operation and determine its readiness for moving into a global marketplace
- Create an international business plan and prepare it for implementation

Hiring for Success: Behavioral Interviewing Techniques

Course Overview

Interviewing sounds easy enough: you arrange for a conversation between you and potential candidates, and then select the best person for a particular position. But what if you could refine the process in such a way that you were confident that you are selecting the right person? How do you separate the good from the great, when they have similar work experience and strengths to offer? This course will give you the skills and tools to hire successful candidates.

Learning Objectives

- Recognize the costs incurred by an organization when a wrong hiring decision is made
- Develop a fair and consistent interviewing process for selecting employees
- Prepare better job advertisements and use a variety of markets
- Be able to develop a job analysis and position profile
- Use traditional, behavioral, achievement oriented, holistic, and situational (critical incident) interview questions
- Enhance communication skills that are essential for a skilled recruiter
- Effectively interview difficult applicants
- Check references more effectively
- Understand the basic employment and human rights laws that can affect the hiring process

Human Resources Training: HR for the Non-HR Manager

Course Overview

In today's fast-moving world, many managers and supervisors are expected to deal with some human resource issues. They may be asked to take part in developing job descriptions, take part in interviews, or take responsibility for discipline. This course will introduce those managers to human resource concepts. We will walk you through the hiring process, from performing a skills inventory to conducting the interview; discuss orientation; and cover some issues that arise after the hiring (such as diversity issues, compensation, and discipline).

Learning Objectives

- Discuss current issues in the human resource field and the changing role of supervisors and managers in terms of HR functions
- Write job specifications and identify core competencies
- Apply methods of finding, selecting, and keeping the best people using behavioral description interviewing techniques

Intermediate Project Management

Course Overview

Project management is not just restricted to certain industries, or to individuals with certification as a project manager. Lots of us are expected to complete assignments that are not a usual part of our job, and to get the job done well, within our budget, and on time. This course is intended for those who understand the conceptual phase of a project's life cycle, including setting goals, creating a vision statement, and creating the Statement of Work. This course will take you through the remaining three stages: planning, execution, and termination.

Learning Objectives

- Identify your project's tasks and resources
- Order tasks using the Work Breakdown Structure
- Schedule tasks effectively
- Use basic planning tools such as a Gantt chart, PERT diagram, and network diagram
- Prepare a project budget
- Modify the project budget and schedule to meet targets
- Identify and manage risks
- Prepare a final project plan
- Execute and terminate a project
- Develop and manage a change control process

Introduction to Neuro Linguistic Programming

Course Overview

Your brain, thoughts, and behavior are at the core of everything that you do every day, even if you aren't aware of it. In order to truly achieve the results that you want to achieve, you must master the art of bringing your unconscious thoughts to the surface, so that you can have real choice over how you interact with and respond to the world. Neuro linguistic programming can give you the tools to do just that.

In this introductory course, you will learn the basics of neuro linguistic programming. We will give you the tools to manage your thoughts, and thereby manage yourself.

Learning Objectives

- Define neuro linguistic programming (NLP) and its key terms
- Describe the key presuppositions of NLP
- Describe the five senses as seen by NLP
- Identify states of mind and modes of thinking using predicates and visual cues
- Develop and refine response strategies for any situation
- Use enriched language to engage your audience
- Interpret body language based on NLP principles
- Ask clean, precise questions to get the information you need
- Use hypnotic language and positive commands to get results

Inventory Management: The Nuts and Bolts

Course Overview

No business can survive very long without an effective program of controls over the parts and materials that are used in producing or distributing goods and services of the firm. Like many other things that depend on human interpretation, “control” means different things to different individuals.

This is an introductory course for you, the warehouse or stockroom manager, the person in charge of what comes in and goes out of your company. You want a smooth and cost-effective operation, with enough products on hand to satisfy needs without stockpiling too much. This course will discuss all aspects of inventory management, including common terms, the inventory cycle, how to maintain inventory accuracy, and what some of the latest trends are.

Learning Objectives

- Understand terms that are frequently used in warehouse management
- Identify the goals and objectives of inventory management and measure your process against these goals
- Calculate safety stock, reorder points, and order quantities
- Evaluate inventory management systems
- Identify the parts of the inventory cycle
- Better maintain inventory accuracy

Knowledge Management

Course Overview

Understanding how to manage the knowledge within your organization is the key to business success. Mismanagement of organizational knowledge comes with a price: frustrated employees, angry customers, and decreased productivity. All of these things can affect our business' bottom line. The purpose behind knowledge management is to help us bridge organizational gaps and to use our greatest asset (our knowledge) to take our business performance to the next level. The theory of knowledge management has emerged to help us harness and enhance both the individual and collective brain power of our businesses. This course will introduce you to knowledge management tips, techniques, and proven processes.

Learning Objectives

- Define knowledge and knowledge management
- Explain the difference between explicit and tacit knowledge
- Identify various knowledge management theoretical models
- Explain how a properly implemented knowledge management program can improve efficiency
- Describe the steps for employing a new knowledge management program in an organization
- Identify the required components for implementing a knowledge management framework within an organization

Leadership Skills for Supervisors

Course Overview

Supervisors are the crucial interface between the employee on the shop floor or the service desk and the managers of the organization. Although they often have more technical experience than the employees they supervise, some may not have a lot of leadership experience. This one-day course will provide the skills in communication, coaching, and managing conflict that are necessary for success.

Learning Objectives

- Learn ways to prioritize, plan, and manage your time
- Identify your primary leadership style
- Develop some flexibility to use other leadership styles
- Determine ways you can meet the needs of employees and co-workers through communication and coaching
- Explore ways to make conflict a powerful force for creative, well-rounded solutions to problems

Lean Process Improvement

Course Overview

Lean principles have come a long way over the past 300 years. From Benjamin Franklin's early ideas, to Henry Ford's work in the 1920's and the Toyoda precepts in the 1930's, to Jeffery Liker's publication of *The Toyota Way* in 2004, Lean processes have evolved from a simple concept to a set of widely used best practices.

This course will give participants the foundation to begin implementing Lean process improvement tools in their workplace. The first part of the course will explore the foundations of Lean through the Toyoda precepts and the five critical improvement concepts (value, waste, variation, complexity, and continuous improvement). The second part of the course will give participants tools to perform continuous improvement in their organization, including 5S, 5W-2H, PDSA, DMAIC, Kaizen, Genchi Genbutsu, and various Lean data mapping methods.

Learning Objectives

- Define Lean and its key terms
- Describe the Toyota Production System and the TPS house
- Describe the five critical improvement concepts
- Use the Kano model to understand, describe, analyze, and improve value
- Identify and reduce various types of waste
- Create a plan for a more environmentally Lean organization
- Use the PDSA and R-DMAIC-S models to plan, execute, and evaluate Lean changes
- Use Lean thinking frameworks, including 5W-2H, Genchi Genbutsu, and Gemba
- Prepare for and complete a basic 5-S
- Describe the key elements of Kaizen events, particularly a Kaizen blitz
- Gather, analyze, and interpret data using flow charts, Ishikawa (fishbone) diagrams, SIPOC diagrams, and value stream maps
- Go back to your organization with a plan to begin incorporating Lean into your corporate culture

Logistics and Supply Chain Management

Course Overview

The supply chain is a crucial part of any business' success. Optimizing the flow of products and services as they are planned, sourced, made, delivered, and returned can give your business an extra competitive edge.

This course will introduce you to the basic concepts of supply chain management, including the basic flow, core models, supply chain drivers, key metrics, benchmarking techniques, and ideas for taking your supply chain to the next level.

Learning Objectives

- Define supply chain management and logistics
- Explain the vertical integration and virtual integration models
- Understand the stages in the basic supply chain flow
- Identify participants in the supply chain
- Recognize supply chain drivers and ways to optimize them
- Align supply chain strategy with business strategy
- Determine what metrics to track and how to benchmark the related data
- Troubleshoot basic supply chain problems
- Identify ways to develop your supply chain, such as using third-party logistics providers (3PL's), insourcing processes, developing sustainable and eco-friendly strategies, leveraging process improvement strategies, and adopting new techniques

Making Training Stick

Course Overview

We have all participated in training courses or workshops. Some of these have been helpful and useful in our everyday lives and others have seemed redundant and a waste of time. How often have we cheered or grumbled at being asked to participate in a training day?

The good news is that all training can be useful and applicable if the trainer keeps some simple tips in mind when developing and applying training. We all learn differently, but there are some truths about learning that can be applicable to most groups and can be tweaked to fit any training session.

Learning Objectives

- Familiarize yourself with strategies that can help learning to stick with the audience in an effective and meaningful way
- Know how to keep learners focused and motivated to absorb material
- Develop an effective training style, using appropriate training aids and techniques

Meeting Management: The Art of Making Meetings Work

Course Overview

Meetings come in all shapes and sizes, from the convention to a quick huddle in an office hallway. This course will be concerned with small working meetings; with groups that have a job to do requiring the energy, commitment, and talents of those who participate. Members of such a group want to get some kind of result out of their time together: solving problems, brainstorming, or simply sharing information. At its best, such a group knows what it is about, and knows and utilizes the strengths of individual members.

Learning Objectives

- Understand the value of meetings as a management tool
- Recognize the critical planning step that makes meeting time more effective
- Identify process tools that can help create an open and safe forum for discussion
- Develop and practice techniques for handling counterproductive behaviors

Networking for Success

Course Overview

Business networking is an effective and efficient way for business people to connect, develop meaningful relationships, and grow their businesses. These achievements don't come through a direct sales approach, however. They come from being interested in helping others, in listening, and in purposefully meeting and introducing people to one another. In this course, you'll learn the essential ingredients for business networking, including in-person, people-centered connections and online spaces such as LinkedIn.

Learning Objectives

- Introduce yourself in a meaningful, memorable way, even if you've never worked on an elevator pitch before
- Be goal focused about networking so that you make the most of events you attend
- Apply the concept of give first and be helpful as part of a system of reciprocity
- Use strategy and systems in order to network effectively
- Leverage the availability and usefulness of the Internet, including LinkedIn and Twitter

Onboarding: The Essential Rules for a Successful Onboarding Program

Course Overview

Did you know that most employees decide to leave a job within their first 18 months with an organization? When an employee does leave, it usually costs about three times their salary to replace them.

You can greatly increase the likelihood that a new employee will stay with you by implementing a well-designed onboarding program that will guide the employee through their first months with the company. This course will explore the benefits of onboarding, show you how to design an onboarding framework, give you ways to customize the program for different audiences (including managers and executives), and demonstrate how to measure results from the program.

Learning Objectives

- Define onboarding and describe how it is different from orientation
- Identify the business benefits of onboarding
- List the factors that contribute to a successful onboarding program
- Build a team to create an onboarding program
- Prepare a vision statement and goals for an onboarding program
- Design a framework for an onboarding program that includes program setup, various types of training, games, progress tracking, and follow-up
- Customize your onboarding framework
- Identify which metrics you should track to evaluate program results
- Create a branded, unique program that will strengthen your company's image and market position

Orientation Handbook: Getting Employees Off to a Good Start

Course Overview

An effective human resource professional knows that managing employee performance is more than responding to problems, conducting performance reviews, or hiring staff.

Performance management begins with an orientation to the organization and the job, and continues on a daily basis as employees are trained and coached.

A thoughtful new employee orientation program, coupled with an employee handbook (or website) that communicates workplace policies, can reduce turnover and those reductions save your organization money. Whether your company has two employees or a thousand employees, don't leave employee retention to chance. Engage them from the moment they are hired; give them what they need to feel welcome, and let them impress you with what they bring to your company.

Learning Objectives

- Understand how important an orientation program is to an organization
- Identify the role of the human resource department in the orientation program
- Recognize how the commitment curve affects both new employees and their managers
- Know what companies can do to deliver their promise to new employees
- Determine the critical elements of effective employee training
- Establish the importance of having an employee handbook for new and long-term employees

Planning for Workplace Safety

Course Overview

Beginning with the Organizational Safety Policy, the company's Safety Plan shows that Senior Management takes the commitment to worker health and safety seriously. The safety plan provides a system of policies, procedures and practices to help prevent accidents/incidents, gives workers the knowledge to help them create a safe working environment and outlines a consistent methodology for the company's approach to Health and Safety. It is one of the more important safety documents that a company can produce.

This course will give you the foundation to develop your Organizational Safety Plan and take the next step in building your safety culture.

Learning Objectives

- Explain what a safety plan will include
- Understand and write an Organizational Safety Policy
- Know the importance of the Introduction to the Safety Plan
- Develop a basic Communications Plan for a specific accident/incident occurrence
- Deciding training solutions to common accidents/incidents
- Understand and explain the importance and structure of Incident Response Plans and Critical Incident Response Plans
- Understand Safety Inspections and Safety Audits as methods to identify unsafe conditions and apply corrective action
- Use a 6S Inspection Checklist to conduct a 6S Inspection
- Brainstorm policies and procedures that you might find in the Appendix of a Safety Plan
- Help your organization write, implement, and review a safety plan

Public Speaking: Speaking Under Pressure

Course Overview

This course has been designed for those in positions where they must speak in front of audiences that are hostile or demanding. This material is also suitable for those who are relatively new speakers who want some encouragement to speak up in meetings or who want some training before they begin making presentations on behalf of the organization. Speaking under pressure, or thinking on your feet, means being able to quickly organize your thoughts and ideas, and then being able to convey them meaningfully to your audience to modify their attitudes or behavior. It applies to formal speeches as well as everyday business situations. It requires presence of mind, goal orientation, adaptation, and judgment. It also requires differentiating between oral and written communications. This course is aimed at improving your skills and learning some new techniques which will give you the persuasive edge when you are making a presentation, fielding difficult questions, or presenting complex information.

Learning Objectives

- Apply quick and easy preparation methods that will work whether you have one minute or one week to prepare
- Prepare for questions, even before you know what those questions will be
- Overcome nervousness that you may have when speaking in front of a group, particularly if the group is not sympathetic to what you have to say
- Use presentation techniques that establish your credibility and get people on your side

Purchasing and Procurement Basics

Course Overview

Purchasing and procurement functions are about much more than bringing goods and services into an organization. They are the foundation of strong, collaborative relationships with suppliers. Since many companies source products from around the globe more frequently than ever, a procurement manager needs strong capabilities. These skills cannot just be learned on the job: they need to be taught. As well, the value of procurement is now recognized as an integral part of cost control within the organization. In this course, you'll learn the basics of procurement, including what a supply chain looks like, the purchasing cycle, essential tools and strategies for making the best purchasing relationships work, managing bids, and more.

Learning Objectives

- Describe what a supply chain is
- Describe your procurement department's role within the organization
- Understand the principles of the purchasing cycle
- Apply the steps needed for managing a competitive bid process, from the request for proposals or qualifications through to negotiating the contract
- Know what it takes to set up a competitive bid for a contract
- Defend your position on why a particular supplier should be selected based on an evaluation strategy
- Be responsible for managing supplier performance, including controlling quality and setting and monitoring standards
- Apply the tools of the procurement trade, from PC-based applications to cloud-based solutions

Research Skills

Course Overview

In this age of information overload, it can be hard to know where to find good information that you can trust. If you're doing research for an important project, report, or proposal, how do you find information that you can count on?

This course will teach you how to research any topic using a number of different tools. We will start with basic techniques, such as reading, memory recall, note-taking, and planning. We will also talk about creating different kinds of outlines for different stages of your project, and how to move from the outline to actual writing, editing, and polishing. Most importantly, we will talk about how to use all kinds of sources, including a library's Dewey Decimal System, journals, and the Internet.

After you complete this course, you'll be ready to find reliable information on any topic, and turn that information into a compelling, accurate piece of writing.

Learning Objectives

- Identify the benefits of proper research and documentation
- Read for maximum information retention and recall
- Take effective notes
- Plan a research strategy
- Identify and use various types of research sources
- Create preliminary and final outlines
- Know how to use style guides and be able to identify the most common styles
- Document and attribute your work to ensure you don't plagiarize

Self-Leadership

Course Overview

Self-leadership puts together taking responsibility for our outcomes, setting direction for our lives, and having tools to manage priorities. Self-leaders work at all levels of an organization. They are front-line workers in every possible role, middle managers, and CEOs. Self-leaders like Walt Disney and Wayne Gretzky worked hard to achieve their dreams without using the term self-leadership. However, they have clearly demonstrated that being in control of their behavior and results, focus, practice, and learning were necessary to achieve their goals.

Self-leadership requires a commitment from individuals to decide what they want from life and to do what's necessary to get the results they want. This course will help participants internalize the four pillars of self-leadership and to make meaningful, empowered choices while taking action to get where they want to go.

Learning Objectives

- Define self-leadership and what it means on an individual level
- Assume responsibility for your results by understanding who you are, what you want, and how to reach your goals
- Describe the four pillars of self-leadership
- Use techniques related to adjusting to change, cultivating optimism, and developing good habits to build your self-leadership

Selling Smarter

Course Overview

It's no secret that the sales industry continues to change and evolve rapidly. This is an exciting and dynamic profession, although it is often underrated and misunderstood. The back-slapping, high pressure, joke-telling sales person has disappeared. In his place is a new generation of sales professionals: highly trained and well groomed, with the characteristics of honesty, trustworthiness, and competence.

Today's top salespeople are in the business of identifying needs and persuading potential customers to respond favorably to an idea that will result in mutual satisfaction for both the buyer and the seller. They do this in a way which puts the customer first, fully knowing that when they meet the customers' needs, sales will follow.

Learning Objectives

- Explain and apply concepts of customer focused selling
- Use goal-setting techniques as a way to focus on what you want to accomplish and develop strategies for getting there
- Apply success techniques to get the most out of your work
- Understand productivity techniques to maximize your use of time
- Identify ways to find new clients and network effectively

Six Sigma: Entering the Dojo

Course Overview

Six Sigma is a set of qualitative and quantitative quality tools that can help a business improve their processes. The efficiency built into the business processes brings about improved profits, confidence and quality. Ultimately this effort is there to ensure customer satisfaction.

The term Six Sigma comes from statistics to indicate that the process outputs fall within three standard deviations from the center (expected value) giving a range of six standard deviations (or 6 sigma- 6σ). As a result in terms of individual outputs it means you would have 3.4 defects per million items.

This course is designed to introduce students to basic concepts of Six Sigma particularly in continuous process improvement. Various quality tools used in process improvements will be explored as well as the importance of customer relationships. Courses in Lean, quality and teams will provide knowledge on the other aspects of how Six Sigma works. It is a predecessor to studies in Six Sigma Yellow, Green and Black Belt.

Learning Objectives

- Understand the Basics of Six Sigma.
- Describe the seven quality tools to solve process problems.
- Describe the various quality management tools.
- Describe incremental and breakthrough improvements and understand the methodologies of continuous improvement projects.
- Describe the importance of customer relationships in a quality organization

Skills You Need for Workplace Success

Course Overview

There have been a number of studies that identify the key skills that workers need to be successful. Various studies call them different things - critical employability skills, soft skills, or transferrable skills. Regardless of the name these skills are critical for workplace success. Eight of the most commonly identified skills are: Being a Productive Team Member, Flexibility, Problem Solving, Resourcefulness, Giving and Receiving Feedback, Self-Confidence, Creative Thinking and Emotional Intelligence. Many of us possess one or more of these attributes already and perhaps all of them. Luckily these skills can be improved upon through training.

This course looks to take you from where you are now to a new level of understanding for the key skills that will help to make you successful at work.

Learning Objectives

- Know your own team member roles and responsibilities
- Understand ways to be an effective team member
- Know how it feels to experience change and know your level of change tolerance
- Understand ways to be flexible in times of change
- Know what a problem is and ways to approach problem solving
- Recognize the self-fulfilling prophecy and its relevance to their work
- Appreciate the variety of behaviors that characterize resourcefulness in the workplace
- Identify tips to giving and receiving feedback
- Realize the uses of feedback to increase their strengths as leaders in the workplace
- Recognize self-confident behaviors in the workplace
- Utilize a three-step process to building your own self-confidence
- Apply a number of group methods for creative thinking

Story Marketing for Small Businesses

Course Overview

Cultures both ancient and modern have strong storytelling traditions. Our brains are wired to share and process information through storytelling. Information presented as a story has the power to inform, influence and motivate.

Story marketing is the process of attracting and engaging customers through story – their story, rather than yours. Instead of the ‘buy our product’ messages of typical marketing campaigns, story marketing tells the customer story and motivates them to connect with your company as a solution to their problem or a way to a better life.

This course will highlight the essentials of story marketing for your small business: story marketing tools, storytelling basics, and how to write and refine your own story for marketing to your target audience.

Learning Objectives

- Define story marketing
- Recognize and use the essential tools of story marketing
- Understand the basics of good storytelling
- Examine ways to connect with your customers
- Refine your company brand for story marketing
- Discover and build your own story
- Polish your story for maximum results

Strategic Planning

Course Overview

If you and the people who work with you don't understand where the company is going, they may all develop their own priorities and actually prevent you from getting where you need to be. Part of getting everyone on board is creating a strategic plan complete with the organization's values, vision, and mission. Then, there's the challenge of bringing these principles to life in a meaningful way that people can relate to. This course will help you describe what you want to do and get people where you want to go.

Learning Objectives

Successfully Managing Change

Course Overview

None of us can escape change, therefore it is well worth developing strategies to manage it! Because everyone has to manage change, having tools to help embrace it lead to the best outcomes. Successfully Managing Change includes the stages and pace of change, dealing with resistance, adaptive strategies, approaching change as an opportunity for growth, and more.

Learning Objectives

- Accept there are no normal or abnormal ways of reacting to change, but that we must start from where we are
- See change not as something to be feared and resisted but as an essential element of the world to be accepted
- Understand that adapting to change is not technical but attitudinal. Change is not an intellectual issue but one that strikes at who you are
- Recognize that before we can embrace the way things will be, we may go through a process of grieving, and of letting go of the way things used to be
- See change as an opportunity for self-motivation and innovation
- Identify strategies for helping change to be accepted and implemented in the workplace

The Practical Trainer

Course Overview

Most people who call themselves trainers today probably didn't start out to be trainers. They often work in a field where they develop extensive knowledge and then are asked to share what they know. Many trainers have some experience with teaching, writing, or leadership, although they come from nearly every field.

As such, people who work as trainers are often put into difficult situations without much understanding of what training is or how to do it well. We know that being a good trainer is the result of developing skills to bring information to an audience. This information will then engage, empower, and encourage continued learning and development.

This course will give you the skills that you need so that your students not only learn, but also enjoy the process, retain information shared, and use their new skills back in the workplace.

Learning Objectives

- Recognize the importance of considering the participants and their training needs, including the different learning styles and adult learning principles
- Know how to write objectives and evaluate whether these objectives have been met at the end of a training session
- Develop an effective training style, using appropriate training aids and techniques
- Conduct a short group training session that incorporates these training concepts

Time Management

Course Overview

Time is money, the saying goes, and lots of it gets lost in disorganization and disruption. We also deal with a constant barrage of technology, people, and tasks that can contribute to that disorganization. Many people find that they flit from one task to another, trying to get everything done, but often falling short. You will learn how to make the most of your time by getting a grip on your workflow and office space, using your planner effectively, and delegating some of your work to other people.

Tough Topics: Talking to Employees about Personal Hygiene

Course Overview

As a manager, you're probably used to dealing with tough situations: employees who insist on being late, team members who miss deadlines, and staff members who can't get along. But conversations about an employee's personal appearance are a whole different ball game. It's something that we often avoid talking about, or worse, make light of.

This course has two major themes. First, we'll give you a framework for having those tough conversations. We'll also give you some guidelines for customizing that framework for your organization. Then, we'll look at some common tough conversations that come up, including body odor, flatulence, poor clothing and hair decisions, and bad breath. You'll walk away well prepared for any kind of challenging conversation.

Learning Objectives

- Identify the advantages to having tough conversations
- Describe the components to an effective behavior modification conversation
- Use your organization's resources to help you deal with hygiene issues
- Overcome barriers that employees put up when discussing hygiene problems
- Resolve hygiene issues such as bad hair days, inappropriate piercings and body art, poor clothing choices, bad breath, body odor, excessive gas, and incontinence
- Nip poor hygiene habits in the bud
- Identify ways to encourage good hygiene at your workplace

Trade Shows: Getting the Most Out of Your Trade Show Experience

Course Overview

Most companies spend huge amounts of time and money designing, construction, outfitting, transporting, and setting up their trade show booth. This course aims to have you understand some of the basic skills that would allow you to get the most out of your trade show experience. The workshop will start by looking at who attends trade shows and why they are there. It will explore a number of things that should be done before the show even starts, including setting trade show goals, understanding your company, and developing good trade show introductions. It will then look at trade show etiquette and skills emphasizing active listening, body language and questioning. A special emphasis will be placed on conducting prospecting. The workshop will end with an exploration of the follow-up necessary after the show. This course will highlight basic skills that should allow you to generate more leads, prospects and especially qualified prospects at your next trade show.

Learning Objectives

- Understand the types of people that attend trade shows
- Develop trade show goals, which are S.M.A.R.T. - Specific, Measurable, Achievable, Relevant and Time-bound
- Know what your company does (products, marketing strategy, your customers) in order to work successfully in the trade show booth
- Realize the importance of good conversation from the opening lines of introduction to the closing of the conversation, hopefully with a potential sale
- Develop a variety of introductions that could be used to engage potential customers at a trade show
- Understand the importance of Pre-Promotion to the success of the trade show
- Realize the importance of targeted promotional giveaways
- Understand the importance of good booth behavior including Active Listening, Body Language, and Questioning.

Transgender Employees: Creating an Inclusive Work Community

Course Overview

A safe, inclusive workplace in many jurisdictions is not just the law; it is a goal of every employee and company that values the contributions, well-being, and productivity of everyone in the organization. In society today, individuals are of many personal communities. In addition to heterosexual or 'straight' there is also LGBTQ2 – Lesbian, Gay, Bisexual, Transgendered, Queer, and 2, for two-spirited: an aboriginal concept of two sexualities within one body. 'Trans', however, refers to gender identity, whereas the other terms describe sexual orientation. The importance of understanding terms of identification is critical to creating and maintain a safe workplace.

Transgender Employees: Creating an Inclusive Community is a course to introduce the importance and elements of safe inclusive workspaces for transgendered persons – those identifying as one gender but born into the body of the opposing gender. This course will offer an introduction to terminology, elements, policies, and resources to build and sustain a safe, inclusive environment for transgendered employees and increase the comfort level and productivity off all in your organization.

Learning Objectives

- Understand the importance and history of inclusivity in the workplace
- Increase your understanding of the transgendered experience
- Explore and address personal and societal biases, misconceptions, and choices
- Identify and implement elements to support a safe inclusive workplace

Using Activities to Make Training Fun

Course Overview

A study of adult educators conducted by Pennsylvania State University doctoral student David Tanis found that playfulness creates a learning environment of “fun, enjoyment, and laughter,” and that their students notice cognitive gains in terms of “engagement, retention, and understanding.”

Ways to incorporate playfulness into the training classroom include the use of games and other activities, along with humor, which will be explored in this course.

Purposeful, well-thought out, and engaging activities in a training course can help learners apply new skills and knowledge, as well as retain that information in a meaningful way, while meeting learning objectives.

Learning Objectives

- Understand how training can include the use of activities
- Explore different types of games
- Identify methods to elicit participant buy-in
- Apply humor principles in adult learning
- Troubleshoot when activities go badly
- Develop your own activities

Women and Leadership: Owning Your Strengths and Skills

Course Overview

Women have a long-standing history in the workforce, in all roles from front-line worker to visionary founder, influential behind-the-scenes patron to front-and-center CEO. As women, however, what are the influences, barriers and benefits to our leadership? Do we use or even acknowledge our strengths and skills?

This is a time of great change in the workforce, in part because of the increase in numbers and influence of women in the workplace. Flex time, daycare and caregiver support, and telecommuting are a few examples of workplace initiatives that benefit everyone, but evolved primarily due to the roles and influence of women who are often juggling multiple home, workplace, and community responsibilities. However, there are some areas in which women could still be more visible and vocal.

This course will explore the history of women in the workforce and offer personal opportunities for exploration, identification, and development of leadership strengths and skills.

Learning Objectives

- Understand a brief history and evolution of women and leadership
- Recognize barriers to women's leadership and how to handle them
- Learn how to use barriers to create benefits
- Define Social and Emotional Intelligence and understand its importance in workplace leadership
- Understand the importance of Self-Awareness in identifying and owning your own strengths and skills.
- Develop a basic vision and brand for your leadership
- Understand the essential leadership skills for women
- Examine steps and skills to good decision making
- Create your own Workplace Philosophy Statement and Action Plan

Working Smarter: Using Technology to Your Advantage

Course Overview

Rudeness in the workplace is increasing to the level that universities are studying it. Everyone is busy, everyone is stressed, and most people take it out on their colleagues at one time or another. We've all been in a situation where we need to print something ASAP and someone has left the printer jammed, or we need coffee and the coffeepot is empty. Technology is supposed to make life easier and simpler, but most managers find themselves cleaning up the messes caused by too many gadgets. This course will show you how to leverage technology to work smarter, not harder.

Learning Objectives

- Make your workplace a technology-friendly place
- Make the most of computers, telephones, instant messaging, e-mail, contact management applications, and scheduling software
- Communicate better with the IT department
- Make the best software and training choices
- Set an IT budget
- Set expectations and responsibilities for security and privacy
- Keep employees safe and healthy
- Develop and implement a system usage policy
- Implement policies for dealing with company property
- Decide whether or not employees should telecommute
- Make telecommuting work
- Deal with workplace rage
- Address technological issues

Working With the Media: Creating a Positive Working Relationship

Course Overview

The media is more widespread and pervasive than it's ever been and its reach is growing all the time. Depending on your line of work or hobbies, or just a plain twist of fate, you could end up being the answer part of a question and answer session with a member of the media.

It's easy to become nervous or tongue-tied when being in this situation. Plenty of people get distracted when they consider that what they are saying could very soon be on some news organization's website or Twitter feed.

Being uneasy is perfectly understandable, but you can learn to deal with the media, on a one-off basis, or as a recurring situation. This course will give you the tools you need when dealing with the media and putting your best foot forward without putting your foot in your mouth.

Learning Objectives

- Prepare for an interview
- Be interviewed successfully
- Craft a media statement
- Develop and issue a press release
- Understand libel and slander
- Develop a media package
- Understand various media outlets
- Build relationships with the media

Workplace Ergonomics: Injury Prevention Through Ergonomics

Course Overview

The human body is a fragile system, and we put many demands on it every day. Activities like reaching to get supplies off of a shelf, sitting in front of a computer for hours every day, and moving heavy products around the shop can all take a toll on our bodies. In this course, you will learn how to make your environment as ergonomic as possible in order to make daily tasks easier on your body and mind.

Learning Objectives

- Define ergonomics and its related terms
- Identify where to get ergonomics information for your region
- Identify how ergonomics can be incorporated into your workplace
- Assess your environment for ergonomic hazards, create ways to resolve those issues, and plan for implementation
- Review and evaluate your ergonomic efforts
- Use change management techniques effectively
- Describe the basic principles of ergonomics
- Outline ergonomic practices for sitting, standing, lifting, carrying, pushing, and pulling
- Design an ergonomic workstation
- Identify important ergonomic features of tools and machines
- Understand the role that environmental factors (such as sound, air quality, and light) play in ergonomics
